

2013 Postdoctoral Career Development Grant

Description:

- The CTSN will award one Postdoctoral Fellow Venture Grant
- Maximum award of \$20,000
- Grants are for 1 year in duration
- Projects should be in line with the CTSN mission, in an area of research distinct from advisor funding and designed to generate preliminary data in support of a K99 or other independent funding.

Eligibility:

- All Emory postdocs working with CTSN Faculty

Instructions:

- No more than 3 pages in length (text size, margins)
- Include Background/Significance, Research Strategy and Budget information
- Include Letter of support from mentor indicating that the mentor supports the project and that the proposal is distinct from the mentor's own work
- Salary support for postdocs or faculty is not allowed
- Include information on the grant application that this pilot project will support and clearly describe how this pilot project will provide a path towards independent funding

Submission:

- Submit by email to Larry Young (lyoun03@emory.edu) by 5:00 PM October 18, 2013
- Proposals will be reviewed by the CTSN Executive Committee
- There will be rapid turn around on funding decisions

CTSN Mission

The CTSN fosters intellectual exchange and collaboration between basic and translational researchers and clinicians at Emory investigating the neurobiology of prosocial behavior and disorders of the social brain. The Center recognizes that research in animal models has the potential to transform clinical practice, and research in clinical populations can provide novel insights into the organization of the social brain. We are committed to translating discoveries made by basic neuroscientists and behavioral biologist into novel strategies for improving social function in psychiatric disorders characterized by deficits in the social domain, including but not limited to Autism Spectrum Disorders and Schizophrenia.

*Promoting Discovery
and Healing of the
Social Brain*
